## PROJECT

### Android App: Car Rent

Technology: Android Studio, java, xml

Car rent created an application to enable users to see the cars near their locations. The users can be divided into two categories: renter and owner. Both groups will interact and proceed further by accessing the listings.

### Android App: SEAT\_CHAI

Technology: Android Studio, java, xml

Build an app especially for students who suffers finding house/seat. To make the house renting so easy this app will help the users to rent or to let any house or seats in their preferable area.

### Student Result Management System

Technology: html, PHP, MySQL

The results of all students are calculated through this website. Besides calculating results, this website also provides attendance statistics

### Restaurant Management System

Technology: html, PHP, MySQL

This website manages meal systems for all restaurants, allowing users to search for them by name, meal name or location.

TRAINING

Data Analyst

Data Solution 360

Successfully completed a 6-month Data Analyst course from Data Solution 360, where I gained hands-on experience in data analysis, data visualization, and statistical techniques. Learned to work with various tools and technologies used in the industry, enhancing my ability to interpret and analyze complex datasets. This training has equipped me with valuable skills applicable to real-world data-driven decision-making.
