Career Objective

Motivated and detail-oriented Junior Software Engineer with hands-on experience in software development, database management, and API integration. Skilled in Java, Python, C/C++, Flutter, and SQL, with additional expertise in web technologies. Seeking a challenging role to apply technical skills and grow into a professional software engineer through real-world projects and collaboration.

Technical Skills

- Programming Languages: Java, Python, C, Kotlin, Dart
- Frameworks & Tools: Flutter, Node.js (basic), Next.js (basic)
- Web Development: HTML5, CSS3, JavaScript, jQuery, Bootstrap
- Database: MySQL, Firebase, SQL Server
- Version Control: Git/GitHub
- Other Skills: REST API integration, SEO Optimization

Professional Experience

Web Administrator

OGS Group | Jan 2023 – Jun 2025

- Work closely with developers to implement content updates and troubleshoot front-end content display issues.
- Coordinate with stakeholders to gather and clarify requirements for new web content projects.
- Create, edit, and optimize engaging website content to align with SEO best practices and brand guidelines.
- Meet project deadlines while maintaining high attention to detail and content standards.
- Processed confirmed orders for courier delivery and ensured timely shipment through coordination with logistics partners.

- Collaborate with design and marketing teams to ensure consistent brand messaging across all web content.

Web Content Editor

Gadget Monkey BD | Nov 2022 – Present

- Uploaded, managed, and optimized web content for SEO-friendly product listings.
- Assisted in troubleshooting and bug reporting for the development team.
- Collaborated with developers to enhance website features and UI/UX.

Education

Bachelor of Science: Computer Science and Engineering

State University of Bangladesh – Dhaka, Bangladesh

CGPA: 2.99 out of 4 (2019)

Projects

- Customer Manager App (Flutter):

Built a Flutter app using GetX with token-based authentication, paginated API data, image loading, clean architecture, and user-friendly responsive UI.

- Flutter Contact App – Android Mobile Application:

Developed a Contact App in Flutter with integrated features including local data storage using Sqflite, click-to-call and email functionality via url_launcher, and Google Maps redirection for address locations, ensuring seamless user interaction and efficient offline access.

- Blood Donation App (Android):

Built a Blood Donation Android App using modern Android development practices including MVVM architecture, Navigation Component with Safe Args, Room Persistence

Library for local data storage, LiveData for reactive UI updates, and DataBinding for efficient UI logic handling; also utilized Intents for seamless screen transitions and data sharing.

- **Weather Android App – A Native Android Application:**

Developed a Weather Forecast Android App using Retrofit to fetch real-time data from a Weather API, implemented MVVM architecture with LiveData for responsive UI updates, used Picasso for efficient image loading, and integrated Navigation Component for structured screen transitions.

- **ToDoList (Android):**

Built a Todo List Android App following MVVM architecture, utilizing Room Persistence Library for local data storage, LiveData for real-time UI updates, and DataBinding for clean UI logic; incorporated Navigation Component for structured navigation and Intents for task management and activity transitions.

Soft Skills

- Problem-solving & debugging
- Strong analytical skills
- Team collaboration & communication
- Time management & adaptability
- Quick learner with growth mindset
