### PROFILE

Diligent and results-driven Software Quality Assurance Engineer with 1 year of experience in ensuring the quality and reliability of software applications. Proficient in designing, implementing, and executing comprehensive test plans and test cases to validate system functionality, performance, and scalability. Adept at identifying and documenting software defects and collaborating closely with development teams to resolve issues promptly. Possess strong analytical skills and a keen eye for detail, coupled with excellent communication and teamwork abilities.

### WORK EXPERIENCE

- Appnap Technologies Limited      1/8/2023-31/5/2024  
Software Quality Assurance & Manual Engineer.
  - Developed and executed test plans, test cases, and test scripts for various software applications, ensuring adherence to quality standards and project requirements.
  - Utilized automated testing tools such as Selenium and Appium to streamline testing processes and improve efficiency.
  - Collaborated with cross-functional teams including developers, product managers, and business analysts to identify and resolve software defects in a timely manner.
  - Conducted regression testing to validate software changes and updates, minimizing the risk of introducing new defects into the system.
  - Actively participated in Agile ceremonies such as sprint planning, daily stand-ups, and sprint reviews, contributing valuable insights to enhance product quality and delivery.
  - Communicated test results and project status updates to stakeholders, facilitating informed decision-making and ensuring alignment with project goals.
  - Testing Android & IOS mobile apps.
  - Scrum meeting with my project manager & presenting it at our client at every week.
