## SKILLS

- **FRONT END** | NextJS • ReactJS • JavaScript • TypeScript • Shadcn • Aceternity UI • Tailwind • Framer Motion • HTML • CSS • SASS • TanStack Query • Zustand • Recharts
- **BACK-END** | NodeJS • Express • Firebase • NestJS • JWT
- **MISCELLANEOUS** | Postgres • Prisma • MongoDB • Digital Ocean • Google Maps • Render • Heroku • Vercel • Prismic CMS
- **TOOLS** | WebStorm • VS Code • Gitlab • Chrome Dev-Tool • Slack • Discord • GitHub • Figma • Docker • Figma • Atlassian
- **SOFT SKILLS** | Team Player • Detail Oriented • Solution Finder

## EXPERIENCE

### Tech Analytica Limited

Full-Stack Software Engineer | Dhaka, Bangladesh

August 2024 – Present

- Built responsive, high-performance web apps using Next.js, TypeScript, and JavaScript, with optimized SSR and CSR for smooth user experiences.
- Led a project end-to-end, handling both frontend and backend, designing UI, integrating REST APIs, and managing state with Zustand and Tanstack Query.
- Worked closely with design and backend teams to ensure smooth feature rollouts, bridging design vision with technical requirements.
- Enhanced code quality and performance by writing reusable components, debugging across devices, and ensuring maintainability.
- Stepped up to lead when needed, coordinating with teammates, sharing tasks, and maintaining Git version control for consistent development flow.
- **Stack:** Next.js, React.js, TypeScript, JavaScript, Shadcn, Tailwind CSS, Recharts, Zustand, Tanstack Query, RESTful APIs, Node.js, Prisma, SSR/CSR, Google Maps, Docker, Git.

### RISIDIO

Software Developer | London, United Kingdom

June 2024 – July 2024

- Improved functionality, performance, and readability of existing codebase to enhance user experience and stability.
- Managed and streamlined data updates in Prismic CMS for accurate, efficient content population.
- Reduced codebase size by 15% through Tailwind CSS optimization, enhancing maintainability and speed.
- Debugged and resolved key issues, ensuring a stable and user-friendly website experience.
- **Stack:** NextJS, ReactJS, JavaScript, Typescript, SASS, Tailwind, Prismic, HTML, CSS, etc.

### GALAXY-NET BD

Jr. Full-Stack Developer | Dhaka, Bangladesh

Sep 2023 – Mar 2024

- Built scalable, responsive front-end applications using React.js and Tailwind based on finalized client UIs.

- Developed back-end APIs with Node.js, Express, MongoDB, and Firebase for seamless data integration.
- Created Backend APIs using NodeJS, Express, MongoDB, and Firebase.
- Conducted thorough manual testing to ensure quality, introducing Agile practices that reduced development time by 25%.
- Collaborated closely with UX and development teams for design alignment.
- **Stack:** ReactJS, JavaScript, Typescript, Bootstrap, NodeJS, Express, MongoDB, Firebase, Tailwind, etc.

## PROJECTS

---

### Ambufast

#### Ambulance Booking Platform

- Developed a comprehensive on-demand ambulance booking platform using Google Maps — the largest ambulance booking platform in Bangladesh.
- Built a complete order lifecycle management system to streamline service delivery.
- Implemented robust order management and user profile functionalities.
- Developed a CMS for admins and call operators, supporting ambulance bookings, payments, and billing operations.
- Utilized Static Site Generation (SSG) to ensure fast, SEO-optimized performance.
- **Tech Stack:** NextJS, ReactJS, TypeScript, Tailwind, Shadcn, Zod, Zustand, Tanstack Query, React Hook Form, Google Maps API, Recharts, ReactPDF, SEO best practices, etc.
- **Live Site:** [Click Here](#)

### JS Green Media

#### Online Landscaping Service

- Built a feature-rich, fully responsive landscaping service booking platform.
- Developed a CMS for admins to manage website content, orders, and invoices efficiently.
- Created a dynamic form builder to enable customizable forms on the website.
- **Tech Stack:** NextJS, ReactJS, TypeScript, Tailwind, Shadcn, Zod, Tanstack Query, React Hook Form, etc.
- **Live Site:** [Click Here](#)

### Shipido (Hobby)

#### An Inventory management Platform - (MERN)

- Developed inventory management system with JWT-based authentication (login, signup, verification).
- Created dashboard for stock, categories, clients, suppliers, sales, purchases, and low-stock alerts.
- Managed products (add, edit, delete), client and employee records, and invoice generation.
- **Tech Stack:** ReactJS, Axios, Material UI, React Firebase Hooks, NodeJS, Express, MongoDB, JWT
- **Live Site:** [Click Here](#) (Reload 2-3 times due to server downtime on free hosting)

## EDUCATION

---

### UNITED INTERNATIONAL UNIVERSITY (UIU) | Dhaka

B.Sc., Computer Science & Engineering

Jul 2021
