## PROJECTS

1. **Title:** Clothing Shop Management System(Ecommerce Project)  
**Description:** My Clothing Shop Management System is an e-commerce web application built with Spring Boot for the backend and Angular for the frontend. It allows customers to browse, search, and purchase clothing items online, while providing admins with tools to manage products, categories, orders, and users. The system features user authentication, a secure checkout process, and a responsive UI for a smooth shopping experience.  
**For details go to:** <https://github.com/Munny99/EcommerceProject>.
  
2. **Title:** Flutter mobile app  
**Description:** This is a flutter e-commerce mobile app. User can easily use and navigate the app also can purchase products.
