📁 PROJECTS

Get Personal Voicemail ⊡
A Mobile Application
This project captures the manual QA testing efforts for the **Get Personal Voicemail App (v1.0)**. It includes comprehensive test cases, detailed bug reports, a well-defined test plan, and a quality report to ensure the app functions smoothly and meets usability expectations. Testing focused on voicemail greetings, quick status, and menu options through functional, UI/UX, regression, and acceptance strategies.

Kimba 2.0 ⊡
A Web Application
This project delivers a full manual testing suite for the Kimba 2.0 application, including detailed test cases, bug reports, a test plan, a test survey, and a quality report. The goal is to validate the app's functionality, usability, and stability through functional, UI/UX, regression, and acceptance testing.

VoiceTotal ⊡
Virtual Number Provider & Call Forwarding Service
Project Link: https://voicetotal.com/ ⊡
Worked as a QA Engineer to test and validate core functionalities, including number provisioning, call forwarding setup, and user account management. Ensured seamless call routing and system reliability across multiple regions

CRM Pluto ⊡
An Automated Insurance CRM & Client Engagement Platform
Project Link: https://meetpluto.io/ ⊡
Worked as an SQA Engineer to test core CRM features including lead conversion, client communication, and automation workflows. Conducted manual and automated testing, reported bugs, and ensured cross-browser compatibility.

Booking Aplication API Testing ⊡
A complete Postman API testing project demonstrating CRUD operations on a mock Book Library API. Includes GET, POST, PATCH, DELETE methods with headers, query params, scripts, and test cases.

🧠 SKILLS

Software Testing Tools
- JIRA, Clickup, Postman, Selenium, JMeter, Fiddler, Testrail, MongoDB, MySQL, MS Excel, Andriod Studio

Soft Skills
- Effective Verbal & Written Communication, Collaboration & Teamwork, Client & Stakeholder Communication, Agile Collaboration, Problem Solving

Operating System
- Windows, Linux (Ubuntu, Kali), IOS

Ethical Hacking
- Vulnerability scanning, bug finding, basic penetration testing, Burp Suite

Programing Language
- HTML, Python(Basic), Java

Documentation & Reporting
- Test Case Documentation (Excel, TestRail)
- Bug Reporting (JIRA, ClickUp)
- Quality Reports, Acceptance Sheets, Test Survey
