ACADEMIC RESEARCH & PROJECTS

Research: "*Enhancing Logical Reasoning Skills in Early Childhood Education through Computational Thinking Approaches.*"
- Accepted for presentation at the International Conference on Recent Trends in Multidisciplinary Research (ICRTMDR).
- Conducted a mixed-methods study on 100 children (ages 4–6) to evaluate computational thinking's impact on logical reasoning.
- Performed statistical analysis using paired t-tests and regression, with thematic coding for qualitative data.

Project:
Motion-Based Light Control System (IoT)
- Designed a motion-based light control system using PIR sensors, Arduino UNO, and Blynk IoT platform.
- Enabled real-time monitoring and manual override via mobile dashboard, improving energy efficiency.
- Collaborated with five more members to complete the project.
